## TRANSFORMING OUR WORK FOR REAL ESTATE CLIENTS

AG Real Estate, blending extensive experience in the market with cutting edge legal technology has created REVEL, a suite of bespoke tools and processes to help our clients transact smarter, quicker, better.

### WE HAVE CREATED...

Online guides enabling our teams to negotiate faster and sharper

Digital knowledge repositories for teams to share market leading know-how, providing crucial data to identify emerging trends

Bespoke tech platforms blending document automation, risk management guidance and data capture tools

### CLIENT BENEFITS

Harnessing legal tech to automate and systemise means we can convert deals more quickly and offer our most competitive fees.

Intelligent use of legal tech not only speeds up traditional reporting methods but also adds data analytics functionality, giving clients additional value with richer, more useful reports.

The increasing trend towards smaller legal panels means bigger client teams at fewer firms and REVEL helps ensure consistent, quality assured products and services.

### WHY WE'VE DONE IT

The legal market continues to deliver services to the real estate sector in the same way that it did 20 years ago, however our clients' expectations have changed dramatically during that time. More than ever, clients demand a high quality legal service delivered consistently at speed. REVEL is part of our response to that challenge and is preparing us for the way we will need to work in the marketplace of the future.
