

14TH DII DESERT ENERGY LEADERSHIP SUMMIT 2024

ADDLESHAW GODDARD KEY CONTACTS

ALEX SARAC

Partner
Head of Infrastructure, Projects & Energy – Middle East
+966 50 8290385
a.sarac@aglaw.com

Alexander Sarac is a Partner in the Riyadh office of Addleshaw Goddard. Alexander advises on energy and infrastructure transactions mainly in Africa and the Middle East. His clients include developers, industry, governments, financial institutions and regional and international development banks. Alexander works with clients to meet their decarbonization goals and his expertise includes project development and financing, advice in relation regulatory frameworks in the energy transition, renewables projects, and trading of energy commodities (including carbon and emissions trading), in an international trading and investment context. Alexander recently moved to Riyadh after living and working in Dubai for eight years. Alexander has been supporting Dii as external legal counsel for many years and is a member of both the MENA Hydrogen Alliance Advisory Board and the Dii Advisory Board.

MARKUS PERKAMS

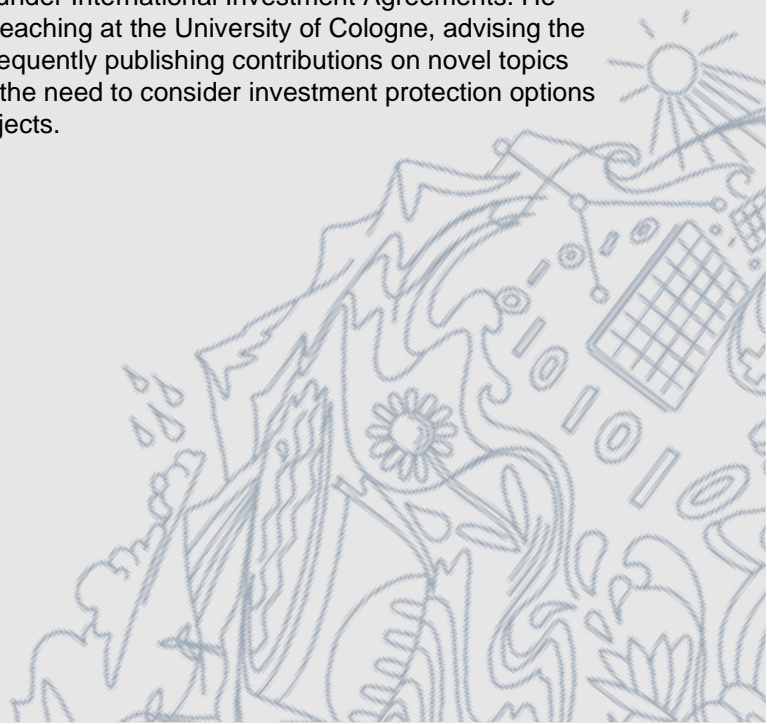

Rechtsanwalt / Partner
International Dispute Resolution – Frankfurt, Germany
+49 (0)162 132 1120
m.perkams@aglaw.com

Markus Perkams is a Partner at Addleshaw Goddard's Frankfurt office, specializing in International Arbitration and Litigation. Dual-qualified in Germany and England and Wales, he expertly handles complex disputes nationally and internationally, both before state courts and arbitral tribunals. His broad expertise spans competition, corporate law, D&O liability insurance, M&A, shareholder agreements, and supply chain disputes across sectors like automotive, banking, construction, energy, and telecommunications.

Markus is notably focused on foreign investment protection under International Investment Agreements. He combines practical experience with academic involvement, teaching at the University of Cologne, advising the International Investment Law Center Cologne (IILCC) and frequently publishing contributions on novel topics surrounding investment protection and arbitration, including the need to consider investment protection options when planning long-term investments in renewal energy projects.

PAUL JONES

Partner
Infrastructure, Projects & Energy – London, UK
+44 7917 515841
paul.jones@addleshawgoddard.com

Paul Jones, a Partner in Addleshaw Goddard's energy transactions practice, has over 18 years of comprehensive experience within the energy sector. His expertise spans the entire energy-value chain including upstream oil and gas, LNG, and guiding clients through energy transition projects towards low carbon alternatives, with a particular focus on green hydrogen and ammonia projects across Europe, Africa and the Middle East. Paul was previously based in the Middle East, serving as General Counsel for a Dubai government-owned international energy company, and he has advised clients on transactions in over twenty countries across Africa.

ERIC GLATTFELD

Rechtsanwalt / Partner
Infrastructure, Projects & Energy – Munich, Germany
+49 (0)152 244 38046
eric.glattfeld@aglaw.com

Eric has more than 13 years of experience in energy law and other public and regulatory law. He particularly advises industrial companies on electricity cost optimization (Special Compensation Scheme, electricity price compensation), obtaining government grants and decarbonization projects in the industry. Additionally, he works with traditional energy supply companies in energy distribution, municipalities, and energy providers in electricity and gas concession procedures, as well as in the field of renewable energy and hydrogen.

MARTON EORSI

Partner
Corporate – London, UK
+44 (0) 7342077326
Marton.Eorsi@addleshawgoddard.com

Marton is an international infrastructure and energy lawyer specialising in the Green Transition. Marton has extensive experience in advising leading institutions on their infrastructure and energy M&A, joint ventures and restructurings. He has advised on a wide variety of energy projects including offshore wind, onshore wind, OFTOs, energy from waste, biogas, battery, geothermal, hydrogen, EV charging and smart meters and many other infrastructure and PPP.
